6:65 Student Social and Emotional Development

Social and emotional learning (SEL) is defined as the process through which students enhance their ability to integrate thinking, feeling, and behaving to achieve important life tasks. Students competent in SEL are able to recognize and manage their emotions, establish healthy relationships, set positive goals, meet personal and social needs, and make responsible and ethical decisions.

The Superintendent shall incorporate SEL into the District's curriculum and other educational programs consistent with the District's mission and the goals and benchmarks of the Ill. Learning Standards. The Ill. Learning Standards include three goals for students:

1. Develop self-awareness and self-management skills to achieve school and life success.
2. Use social-awareness and interpersonal skills to establish and maintain positive relationships.
3. Demonstrate decision-making skills and responsible behaviors in personal, school, and community contexts.

The incorporation of SEL objectives into the District's curriculum and other educational programs may include but is not limited to:

1. Classroom and school-wide programming to foster a safe, supportive learning environment where students feel respected and valued. This may include incorporating scientifically based, age-and-culturally appropriate classroom instruction, District-wide, and school-wide strategies that teach SEL skills, promote optimal mental health, and prevent risk behaviors for all students.
2. Staff development and training to promote students' SEL development. This may include providing all personnel with age-appropriate academic and SEL and how to promote it.
3. Parent/Guardian and family involvement to promote students' SEL development. This may include providing parents/guardians and families with learning opportunities related to the importance of their children's optimal SEL development and ways to enhance it.
4. Community partnerships to promote students' SEL development. This may include establishing partnerships with diverse community agencies and organizations to assure a coordinated approach to addressing children's mental health and SEL development.
5. Early identification and intervention to enhance students' school readiness, academic success, and use of good citizenship skills. This may include development of a system and procedures for periodic and universal screening, assessment, and early intervention for students who have significant risk factors for social, emotional, or mental health conditions that impact learning.
6. Treatment to prevent or minimize mental health conditions in students. This may include building and strengthening referral and follow-up procedures for providing effective clinical services for students with social, emotional, and mental health conditions that impact learning. This may include student and family support services, school-based behavioral health services, and school-community linked services and supports.
7. Assessment and accountability for teaching SEL skills to all students. This may include implementation of a process to assess and report baseline information and ongoing progress about school climate, students' social and emotional development, and academic performance.

6:122 Use of Isolated Time Out and Physical Restraint

Isolated time out and physical restraint as defined below shall be used only as a means of maintaining discipline in schools (that is, as a means of maintaining a safe and orderly environment for learning) and only to the extent that they are necessary to preserve the safety of students and others. Neither isolated time out nor physical restraint shall be used in administering discipline to individual students, i.e., as a form of punishment.

Isolated Time Out

"Isolated time out" means the confinement of a student in a time-out room or some other enclosure, whether within or outside the classroom, from which the student's egress is restricted.

The use of isolated time out shall meet the requirements of the Illinois State Board of Education rules pertaining to use of isolated time out and physical restraint (23Ill.Admin.Code 1.285). By way of example, considerations include: enclosure ceiling height, size and dimensions; construction materials and potential hazards; door construction, including locking mechanism; visual monitoring and communication capabilities and proximity of adult supervision. A student shall not be kept in isolated time out for more than 30 minutes after he or she ceases presenting the specific behavior for which isolated time out was imposed or any other behavior for which it would be an appropriate intervention.

Physical Restraint

"Physical restraint" means holding a student or otherwise restricting his or her movements. "Restraint" does not include momentary periods of physical restriction by direct person-to-person contact, without the aid of material or mechanical devices, accomplished with limited force and that are designed (i) to prevent a student from completing an act that would result in potential physical harm to himself, herself, or another, or damage to property or (ii) to remove a disruptive student who is unwilling to voluntarily leave the area.

Physical restraint may only be employed when: (i) the student poses a physical risk to himself, herself, or others, (ii) there is no medical contraindication to its use, and (iii) the staff applying the restraint have been trained in its safe application. Students shall not be subjected to physical restraint for using profanity or other verbal display of disrespect for themselves or others. A verbal threat shall not be considered as constituting a physical danger unless a student also demonstrates a mean of or intent to carry out the threat. Any application of physical restraint shall take into consideration the safety and security of the student. Further, physical restraint shall not rely upon pain as an intentional method of control. In determining whether a student who is being physically restrained should be removed from the area where such restraint was initiated, the supervising adult(s) shall consider the potential for injury to the student, the student's need for privacy, and the educational and emotional well-being of other students in the vicinity. A student shall be released from physical restraint immediately upon a determination by the staff member administering the restraint that the student is no longer in imminent danger of causing physical harm to himself, herself, or others.

Whenever physical restraints are used, school personnel shall fully document the incident, including the events leading up to the incident, the type of restraint used, the length of time the student is restrained, and the staff involved. The parents or guardian of a student shall be informed whenever physical restraints are used.

The following shall also apply in the use of isolated time out and physical restraint:

- a. The ISBE rules are adopted as SPEED's written procedure to be followed by personnel in the use of isolated time out or physical restraint. (See ISBE rules, §§1.280, 1.285)
- b. The Building Principal is the school official who will be informed of incidents and maintain the required documentation when isolated time out or physical restraint is used. (See ISBE rules §§1.280, 1.285)

- c. The Building Principal will investigate and evaluate any incident that results in an injury that the affected student (or the responsible parent or guardian), staff member, or other individual identifies as serious.
- d. The Building Principal will put together a description of the alternative strategies that will be implemented when determined advisable pursuant to §1.285(f)(4) of the ISBE rules.
- e. The Building Principal or designee shall prepare and maintain in annual review format a description of the use of isolated time out or physical restraint in SPEED programs. This annual review shall include:
 - 1. the number of incidents involving the use of isolated time out or physical restraint;
 - 2. the location and duration of each incident;
 - 3. the identification of the staff members who were involved;
 - 4. any injuries or property damage that has occurred;
 - 5. the timelines of parental notification and administrative review.

6:310 High School Credit for Non-District Experiences; Course Substitutions; Re-Entering Students

Credit for Non-District Experiences

A student may receive high school credit for successfully completing any of the listed courses or experiences even when it is not offered in or sponsored by the District, as approved by their home District:

1. Distance learning course, including a correspondence, virtual, or online course
2. Courses in an accredited foreign exchange program
3. Summer school or community college courses
4. College or high school courses offering dual credit at both the college and high school level
5. Foreign language courses taken in an ethnic school program approved by the Illinois State Board of Education
6. Work-related training at manufacturing facilities or agencies in a Tech Prep Program
7. Credit earned in a Vocational Academy

The student must seek approval from the Superintendent of their home District or designee to receive graduation credit for any non-District course or experience. The Superintendent or designee shall determine the amount of credit and whether a proficiency examination is required before the credit is awarded. As approval is not guaranteed, students should seek conditional approval of the experience before participating in a non-District course or experience. The student assumes responsibility for any fee, tuition, supply, or other expense. The student seeking credit is responsible for (1) providing documents or transcripts that demonstrate successful completion of the experience, and (2) taking a proficiency examination, if requested. The Superintendent or designee shall determine which, if any, non-District courses or experiences, will count toward a student's grade point average, class rank, and eligibility for athletic and extracurricular activities. When applicable, the Building Principal or designee shall, prior to the first day of class, inform individual high school students enrolled in a mixed enrollment dual credit course that includes students who have and have not met the community college's criteria for dual credit coursework of whether or not they are eligible to earn college credit for the course. This section does not govern the transfer of credits for students transferring into the District.

Substitutions for Required Courses

Vocational or technical education. A student in grades 9-12 may satisfy one or more high school courses (including physical education) or graduation requirements by successfully completing related vocational or technical education courses if:

1. The Building Principal approves the substitution(s) and the vocational or technical education course is completely described in curriculum material along with its relationship to the required course; and
2. The student's parent/guardian requests and approves the substitution(s) in writing on forms provided by the District.

Registered Apprenticeship Program. The Superintendent or designee will ensure that the District complies with State law requirements for registered apprenticeship programs. The opportunities and requirements for registered apprenticeship programs contained in this policy will be posted on the District's website, and parents/guardians and students will also be notified of such opportunities in the appropriate school handbook(s).

2. The registered apprenticeship program is listed by the District, or the student identifies a registered (but not listed) apprenticeship program with a business or organization if one is not offered in the District;
3. The student enrolled in a registered apprenticeship program has the opportunity to earn post-secondary credit toward a certificate or degrees, as applicable;
4. The student's parent/guardian requests and approves the substitution(s) in writing on forms provided by the District and on its website;
5. The Building Principal approves the substitution(s); and
6. All non-academic requirements mandated by the School Code for high school graduation that would otherwise prohibit or prevent the student from participating in the registered apprenticeship program are waived.

Advanced placement computer science. The advanced placement computer science course is equivalent to a high school mathematics course. A student in grades 9-12 may substitute the advanced placement computer science course for one year of mathematics, in accordance with Section 27-22 of the School Code. The transcript of a student who completes the advanced placement computer science course will state that it qualifies as a mathematics-based, quantitative course, as approved by home district policy.

Substitutions for physical education. A student in grades 9-12, unless otherwise stated, may submit a written request to the Building Principal to be excused from physical education courses for the reasons stated below. The Superintendent or designee shall maintain records showing that the criteria set forth in this policy were applied to the student's individual circumstances, as appropriate.

1. Ongoing participation in a marching band program for credit;
2. Enrollment in Reserve Officer's Training Corps (ROTC) program sponsored by the District;
3. Ongoing participation in an *interscholastic* or *extracurricular athletic program* (organized school-sponsored or school-sanctioned activities for students that are not part of the curriculum, not graded, not for credit, generally take place outside of school instructional hours, and under the direction of a coach, athletic director, or band leader);
4. Enrollment in academic classes that are required for admission to an institution of higher learning (student must be in the 11th or 12th grade); or
5. Enrollment in academic classes that are required for graduation from high school, provided that failure to take such classes will result in the student being unable to graduate (student must be in the 11th or 12th grade).

A student who is eligible for special education may be excused from physical education courses pursuant to 7:260, *Exemption from Physical Education*.

Volunteer service credit. A student participating in the District's Volunteer Service Credit Program, if any, may earn credit toward graduation for the performance of community service. The amount of credit given for program participation shall not exceed that given for completion of one semester of language arts, math, science, or social studies.

Individuals younger than 21 years of age may re-enter high school to acquire a high school diploma or an equivalency certificate, subject to the limitations in Board policy 7:50, *School Admissions and Student Transfers To and From Non-District Schools*. 6:320 High School Credit for Proficiency

Proficiency Credits

Subject to the limitations in this policy and State law, the Superintendent is authorized to establish and approve a program for granting credit for proficiency with the goal of allowing a student who would not benefit from a course because the student is proficient in the subject area to receive credit without having to take the course. A student who demonstrates competency under this program will receive course credit for the applicable course and be excused from any requirement to take the course as a graduation prerequisite. No letter grade will be given for purposes of the student's cumulative grade point average. The Superintendent or designee shall notify students of the availability of and requirements for receiving proficiency credit.

Proficiency credit will be offered in the following subject areas:

Foreign language - A student is eligible to receive one year of foreign language credit if the student has graduated from an accredited elementary school and can demonstrate proficiency, according to this District's academic criteria, in a language other than English. A student who demonstrates proficiency in American Sign Language is deemed proficient in a foreign language and will receive one year of foreign language credit. A student who studied a foreign language in an approved ethnic school program is eligible to receive appropriate credit according to the level of proficiency reached; the student may be required to take a proficiency examination.

Other proficiency testing - The program for granting credit for proficiency may allow, as the Superintendent deems appropriate, course credit to be awarded on the basis of a local examination to a student who has achieved the necessary proficiency through independent study or work taken in or through another institution. Proficiency testing may also be used to determine eligible credit for other subjects whenever students enter from non-graded schools, non-recognized or non-accredited schools, or were in a home-schooling program.
